Note on Sources and Inclusion

This bibliography lists journal articles about NLP. The primary interest is in peer-reviewed journals, however inclusion of an article does not necessarily mean that the relevant journal is peer-reviewed.

- References are from searches on standard academic electronic search databases as cited, through which abstracts can usually be found. For copyright reasons this listing does not presently include abstracts. Such databases are often accessible only through academic gateways, so may not be available via the public internet.
- We have also consulted, and wish to acknowledge, the University of Bielefeld (Germany) NLP research database (<http://www.nlp.de/cgi-bin/research/nlp-rdb.cgi>). Abstracts for articles included in this database are available at the Bielefeld website, as noted. The database specialises in empirical studies of NLP, and is especially helpful in listing student dissertations. However we note that there are no entries with a publication date more recent than 1998 (when accessed on 13.2.2006).
- Apart from doctoral theses, dissertation abstracts are not included here. For these, in addition to the University of Bielefeld site, see Dissertation Abstracts International (<http://www.asu.edu/lib/resources/db/dissabs.htm>).
- Articles from NLP journals (e.g. NLP World, Rapport) are not listed specifically. For a complete listing of NLP World articles (1994 – 2001) see <http://theletterworthpress.com/nlpworld/> (accessed 19.4.2006).
